RT ECO Grease Trap Wastewater Treatment System effectively separates Fat, Oil & Grease in addition to separation of settle-able particulate matter.

RT ECO Grease Trap Wastewater Treatment Systems could be installed at restaurants, large kitchens, food and beverage processing establishments, automobile units, etc., for efficient separation of animal fat, cooking oil and grease present from the wastewater.

Overspills, bad smell, blockage of pipes and risk of flooding.
RT ECO Grease Trap Wastewater Treatment System is designed to achieve a high efficiency in separating fat, oil and grease, meeting permissible environmental discharge standards or it could be ideally used for achieving 'Zero Liquid Discharge' regulations. The treated water could be reused by the establishment suitably.

RT ECO Grease Trap Wastewater Treatment System is designed to achieve a high efficiency in separating fat, oil and grease, meeting permissible environmental discharge standards or it could be ideally used for achieving 'Zero Liquid Discharge' regulations. The treated water could be reused by the establishment suitably.
Electrochemical effluent treatment systems are fully automatic, skid mounted, designed for continuous operation which converts effluent into reusable water.

**Unique Features**
- Plug & play system
- Fully automated
- Instant start/stop operation
- Small footprint
- Low operating cost
- Requires low power
- No chemicals required
- Odour-free and noiseless operation
- Durable and non-corrosive components
- Suitable for remote locations
- Consistent and reliable results
- Odourless & colourless treated water
- High efficiency in COD, BOD, pollutant removal
- 100% disinfected treated water (bacteria-free water)
- Very low sludge generation
- Produces reusable water
- Meets environmental regulations

**Input - Output Parameters**
